DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Garcia-Ortiz (U.S. Patent No. 6,392,704 B1 in view of Blackshear (U.S. Patent No. 4,945,367).

Garcia-Ortiz shows a housing 12 provided with a shooting window 14 facing in a slanting direction with respect to the horizontal at installation, and a camera 22. Thus, Garcia-Ortiz shows the claimed invention, except for a camera rotation device having a pan rotation axis based on the horizontal direction. Blackshear shows a surveillance camera having a rotation device that rotates the camera in the pan and tilt directions. It would have been obvious to one of ordinary skill in the art to provide the surveillance camera 22 of Garcia-Ortiz with pan and/or tilt means to adjust the camera orientation in order to obtain the desirable feature of being able to aim the camera in a particular direction.

Allowable Subject Matter

3. Claims 1-7 and 9 are allowed. The primary reason for allowance of claims 1-7 and 9 is the claim limitation for a housing having first and second mounting structures and a window or dome facing in a slanting direction with respect to a horizontal direction in the first and second mount positions.
